Introduction Horizontal drilling technology has the direction:

Horizontal guided drilling technology provides the solution for underground pipe installation without excavation. Special technology is suitable for underground pipe installation works.

- Used for installation of various kinds of electric, telecommunications, water supply pipes ... with small diameter.
- Technology can be installed pipe up to 300mm with a maximum distance of 60m.
- Directional drilling heads ensure the correct installation position in the underground space.

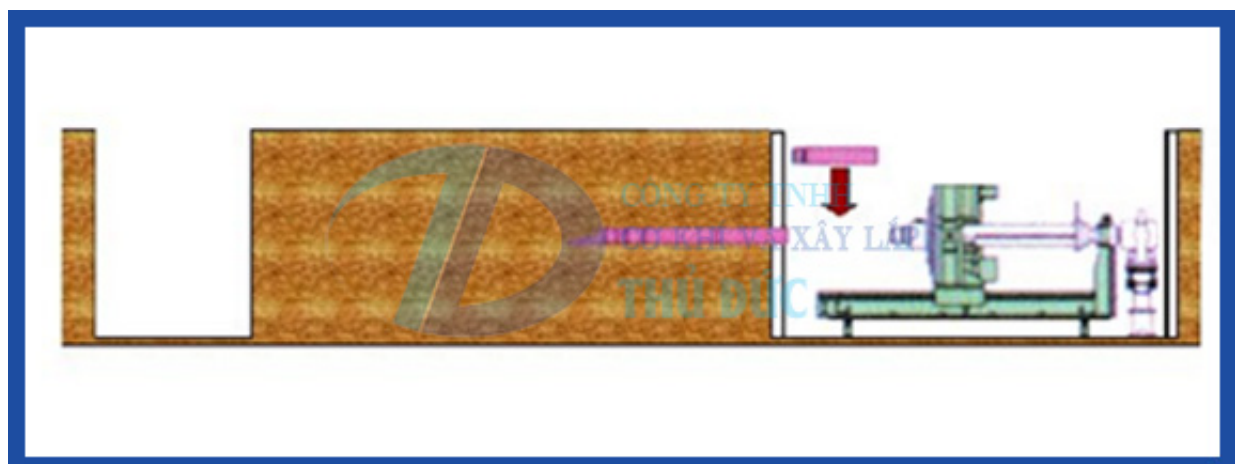

CONSTRUCTION PROCESS

Step 1: Install the device

Step 2: Drill the direction

Step 3: Dredge the land

Step 4: Install the tube

HYDRAULIC SHAFT

- Include a hydraulic cylinder system that pushes the hose and the hydraulic motor transmits rotational motion to the drilling rod.

- Convenient operator panel.

HYDRAULIC RESOURCES

- Designed lightweight on steel frame, convenient when moving.
- Remote control.
- Diesel-cooled diesel engine.
