Weigh	160 Kg	330kg	550kg	820kg
Mixing speed	70 rpm	70 rpm	70 rpm	70 rpm

CUTTING TOOLS.

We supply equipment and technology transfer light brick production by manual cutting method with capacity from 10 m³ to 60 m³ per day with all brick sizes according to construction standards Vietnam.

Mold cut wire

Pouring concrete into the mold

Cutting bricks

Brick after cutting:

Highlights:

- Low investment cost (only 70 million / set of equipment)
- Make use of surplus labor in rural areas to reduce production costs.
- The quality of bricks ensures the required size and compressive strength.
- The surface is cut wire should be easy to plaster.

- The time to cut, not broken bricks due to machinery problems such as using brick cutter.
